Graduate Product Design (GPD)

Are you interested in hands-on **Product Design**?

Would you like **9 months of design experience** in Electro-Mechanical systems?

Would you like to work closely with **Leading Industry Sponsors**?

Enroll in the Graduate Product Design (GPD) course offered by the M.E. Department

This two-semester course sequence is taught by multiple design faculty, and consists of interdisciplinary teams of four students working together on a sponsored design project. The end result of this project is a fully-tested, and functional product. In many cases the project hardware will be representative of the final manufactured product.

**INDUSTRY PARTNERS/COLLABORATORS**

- Covidien
- Oracle
- Los Alamos National Laboratories
- CaridianBCT
- Medtronic
- Sandia National Laboratories
- Agilent Technologies
